PROJECTS

Instagram Clone(Insthagram):

It is a minified clone of instagram. User can add post, see their own and other users post, interact with post such as like and comment. This clone is made with PERN stack with technologies like JWT, REDUX, BCRYPT and many more.

Todo App:

Simple Todo App made with MERN stack and Redux state management.

Food Delivery:

It is a platform for restaurants/hotels to connect with their customers, showcasing the variety of foods they can offer. This web application is built by using MERN stack with Redux state management.

Education Management System | 2019:

It is a web application used by KUSOEd to manage thier students application and registration forms. It also helps KUSOEd to manage their teaachers and professors.

Bulk Messaging System | 2019:

It is a web application helping a company or a corporation to message through their contact number to multiple entities at once.
